

Provide Verifying documentation for one option per category.

I. Measles, Mumps, and Rubella (MMR)

Option A Two live attenuated MMR vaccines

Option B Proof of individual titers – attach titer document (Positive titers represent immunity)

II. Tuberculosis (TST=PPD)

Option A T-Spot Serology and/or QuantiFERON TB Gold Blood test. Also referred to as Interferon-Gamma Release Assays (IGRA). The result must be current within 3 months of observership start date.
For positive serology, provide documentation with a negative/clear chest x-ray report, treatment received, and a TB symptom questionnaire

Option B For history of bacilli Calmette-Guerin (BCG) vaccination: provide documentation of a T-Spot/QuantiFERON Gold Blood test result within 3 months of observership start date.

III. Varicella (Chicken Pox, VZV) Childhood history of disease is not sufficient.

Option A Two live VZV vaccines

Option B VZV Serologies (attach titer documentation)
Positive titer = immune, Negative titer = not immune (option A required)

IV. Hepatitis (HBV)

Option A Hepatitis B Vaccination. Three (3) doses required or titers

Option B Hepatitis B Surface Antibody (HBVSAB) Test Results (provide serology documentation)
positive=immune, negative=non-immune)

V. Annual Mandatory Flu Vaccine (October-March) please submit influenza verification documentation or submit Emory Healthcare waiver signed by physician or religious leader.

VI. COVID-19 Immunization

Option A 2 dose series (doses separated by 21 days) of Pfizer-BioNtech

Option B 2 dose series (doses separated by 28 days) of Moderna

Option C Single dose of Johnson & Johnson

Option D Please upload supporting documentation of COVID-19 vaccination series if not any of the aforementioned brands

Immunization clearance is required prior to observing in Emory hospitals or clinic
